SLA Guarantee	99%	99.5%	99.9%

PayCrypt Gateway

API Integration Guide

Base URL Configuration

Configure your integration to use the PayCrypt Gateway API endpoints:

```
Production: https://api.paycrypt.online/v1 Sandbox:  
https://sandbox-api.paycrypt.online/v1
```

Authentication

```
import requests headers = { 'Authorization': 'Bearer YOUR_API_KEY',  
    'Content-Type': 'application/json', 'X-HMAC-Signature': hmac_signature  
} response = requests.post('https://api.paycrypt.online/v1/payments',  
    headers=headers, json=payment_data)
```

Core API Endpoints

Endpoint	Method	Description
/payments	POST	Create new payment
/payments/{id}	GET	Get payment status
/payments/{id}/confirm	POST	Confirm payment
/wallets	GET	List available wallets
/rates	GET	Get current exchange rates
/webhooks	POST	Register webhook URL

PayCrypt Gateway

SDK Documentation

Python SDK

```
from paycrypt_sdk import PayCryptClient # Initialize client client =
PayCryptClient( api_key="your_api_key", secret_key="your_secret_key",
environment="production" # or "sandbox" ) # Create payment payment =
client.payments.create({ "amount": 100.00, "currency": "USD",
"crypto_currency": "BTC", "callback_url":
"https://yoursite.com/webhook", "return_url":
"https://yoursite.com/success" }) print(f"Payment ID: {payment.id}")
print(f"Payment URL: {payment.payment_url}")
```

JavaScript SDK

```
import PayCrypt from 'paycrypt-js-sdk'; const paycrypt = new
PayCrypt({ apiKey: 'your_api_key', secretKey: 'your_secret_key',
environment: 'production' }); // Create payment const payment = await
paycrypt.payments.create({ amount: 100.00, currency: 'USD',
cryptoCurrency: 'BTC', callbackUrl: 'https://yoursite.com/webhook',
returnUrl: 'https://yoursite.com/success' }); console.log('Payment
ID:', payment.id);
```

Security & Compliance

Security Feature	Implementation
HMAC Verification	SHA-256 signature validation for all requests
API Rate Limiting	Configurable limits to prevent abuse
SSL/TLS Encryption	End-to-end encryption for all communications
Webhook Security	Signed webhooks with timestamp validation
Access Control	Role-based permissions and IP whitelisting
Audit Logging	Comprehensive logs for all transactions
Compliance	SOC 2 Type II, PCI DSS compliant infrastructure

Quick Start Onboarding Checklist

- Account Setup & Verification
- API Key Generation
- Webhook URL Configuration
- SDK Installation & Testing
- Sandbox Environment Testing
- Production Deployment
- Monitoring & Analytics Setup
- Support Channel Configuration
